

PRITAM CHAVAN

Mumbai, Maharashtra

9130238226 | chavanpritam172@gmail.com | linkedin.com/in/chavanpritam | github.com/pritam195

Education

Veermata Jijabai Technological Institute (VJTI)

July 2023 – May 2027

B.Tech in Electronics and Telecommunication (Minor in Data Science) (CPI: 7.82)

Mumbai, Maharashtra

Technical Skills

Programming: C++ (*primary*), Python, JavaScript, SQL
Frontend: HTML, CSS, Tailwind CSS, React.js
Backend: Node.js, Express.js, Flask, Socket.IO, REST APIs
Databases: MongoDB, MySQL, Firebase, Redis
Tools/Platforms: Git, GitHub, Postman, Docker

Libraries/APIs: NumPy, Pandas, Scikit-learn, Sentence Transformers, Matplotlib, pdfplumber, Gemini API
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

Software Development Engineer Intern

Jun 2026

Monarch Techno Engineering Solutions Pvt. Ltd.

Navi Mumbai

- Built a responsive chatbot widget using React.js and Tailwind CSS, implementing real-time message rendering, input validation, loading states, and a mobile-friendly UI.
- Integrated the chatbot frontend with Node.js/Express REST APIs for query dispatch, FAQ-based response matching, fallback handling, and API error-state management.

Projects

Vync – Real-Time Meeting Platform | *Live Demo* *GitHub*

May 2026

- Stack:* MERN, Redis, Socket.IO, WebRTC, Docker, coturn
- Built a production-oriented video meeting platform with **WebRTC** and **Socket.IO**, supporting authenticated/guest meetings, live audio-video calls, chat, file sharing, and a collaborative whiteboard/code editor.
- Designed a **Redis-backed** active room state layer for participants, waiting rooms, whiteboard state, and live code state, reducing MongoDB dependency for high-frequency real-time updates.
- Integrated a **coturn TURN server** with STUN/TURN fallback to improve WebRTC connectivity for users behind NAT/firewalls, containerized using **Docker Compose**.

SafeRoutePlanner – Safety-Aware Navigation System | *GitHub*

Apr 2026

- Stack:* React.js, Node.js, Express.js, Flask, Python, OSMnx, NetworkX, GeoPandas, Shapely, Leaflet.js
- Engineered a full-stack safety-aware navigation system (React → Express → Flask) using a modified **Dijkstra's algorithm** and OpenStreetMap data to compute and compare the safest and shortest pedestrian routes in real time.
- Built a **5-feature geospatial safety-scoring engine** using OSMnx, GeoPandas, Shapely, and NetworkX to evaluate **108,000** Mumbai road segments based on lighting, police proximity, crowd density, connectivity, and risk-zone proximity.
- Optimized route computation through grid-based graph caching and developed an interactive **Leaflet.js** interface with segment-level safety visualization and route comparison analytics.

ResumeAI – AI-Powered Resume Analyzer | *Live Demo* *GitHub*

Feb 2026

- Stack:* MERN, Flask, Python, Firebase, Sentence Transformers, Gemini API, pdfplumber
- Built a full-stack ATS Resume Analyzer with a **3-tier microservice architecture** (React → Express → Flask ML Service) integrating NLP pipelines for resume parsing, skill extraction, and semantic matching.
- Implemented **Aho-Corasick O(n)** multi-pattern skill extraction across **25+** tech categories with alias canonicalization, replacing naive O(n×m) search for real-time resume-to-JD matching at scale.
- Engineered a **10-dimension** resume quality engine and weighted scoring model (**40%** skill match, **40%** quality, **10%** semantic similarity via Sentence Transformers, **10%** experience) to generate AI-powered resume feedback.

CampusCart – Campus Marketplace Platform | *Live Demo* *GitHub*

Oct 2025

- Stack:* React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Cloudinary, Multer, bcrypt, Axios
- Architected a modular full-stack marketplace developing **20+ RESTful APIs** across **6 modules**, with a multi-image upload pipeline via Multer + Cloudinary.
- Implemented secure authentication with **JWT**, bcrypt password hashing, and dual-layer protected routes, deploying across Vercel, Render, and MongoDB Atlas with **CORS-restricted origins** for production security.

Achievements & Leadership

- LOC Hackathon Finalist** at D. J. Sanghvi College of Engineering; ranked among the top 30 teams out of 300+ participating teams.
- Smart India Hackathon (SIH) 2025:** Led a team to clear the institute-level internal hackathon round at VJTI.
- Community of Coders:** Mentored 4 juniors in end-to-end web development projects under the Inheritance 2025 program.
- LeetCode (profile):** Solved 500+ problems covering data structures and algorithms.
- CodeChef (profile):** 3-Star coder with a maximum rating of 1601.
